Clean drive

On Children group from Narrative Report: The United Nations has proclaimed May 22 is the International Day for Biological Diversity to increase understanding and awareness of biodiversity issues. When first created assembly in the late 1993, 29 December was designated the international Day for biological Diversity. Later it was changed to May 22. We just plan a clean drive on that historical background day.

Biodiversity is the variety of living organisms, including the diversity within species, between species and within ecosystems. Our beautiful planet contains a rich wealth of biodiversity; however it is currently declining faster than at any other time in human history. We try to teach all this things to children in a simple but effective way for saving our earth and their feature.

The drive started with an awareness on waste segregation and uses of recycling things and their part for saving earth. The childrens were felicitated by the field coordinators Mr. Abishek and Ms. Prince, removed the garbage from their own place and put into separate dustbins (degradable and non-degradable). Children put into correct dustbins, they easily

understand the concepts. At the end children take pledge to throw waste only into dustbins. Children taught the community to segregate the garbage and put them in dustbins. Explained about cleanliness and non-use of one time use plastics.
