### Introduction

The COVID-19 preventive lockdown has changed the life of every individual in the country. While the lockdown is laudable and very much required to fight the pandemic, it has also led to numerous problems, especially for the underprivileged section of the society. The low income families live in urban and rural were affected by the sudden lockdown. The situation led to hunger, poverty, and malnutrition, loss of jobs and employment and livelihood especially for the migrants, daily wage earners and collies. And shockingly, many children have become even more vulnerable to exploitation. Children belonging to the economically weaker sections of the society have become susceptible to exploitation due to financial crisis.

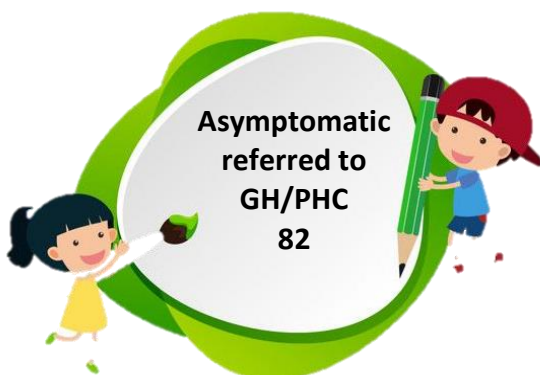

In response to this crisis Don Bosco Anbu Illam acted upon supporting the needy children and their families. As an initial process we mapped the deserving children families, underprivileged families' migrants in Salem and Namakkal District. We decided to support the families with Grocery materials required for a family for one month.
